Office Action Summary	Application No. 10/511,028	Applicant(s) BOAST, IAN	
	Examiner Shelley Self	Art Unit 3725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 11 October 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☐ Claim(s) _____ is/are pending in the application.
4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-3 and 7-13 is/are rejected.
- 7) ☒ Claim(s) 5 and 6 is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 11 October 2004 is/are: a) ☐ accepted or b) ☒ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☒ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☒ All b) ☐ Some * c) ☐ None of:
1. ☒ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Amendment

The preliminary amendment filed on October 11, 2004 has been considered and an action on the merits follows

Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: 68. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement-drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the examiner does not accept the changes, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because it is missing the following subtitles:

Background of the Invention

Summary of the Invention

Brief Description of the Drawings

Detailed Description of the Drawings

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7-9 and 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Altmayer (4,927,089). Altmayer discloses a jaw crusher for crushing material the jaw crusher comprising a frame (12) having a pair of opposing walls (fig. 1), a fixed jaw (14), a swing jaw (16) disposed between said walls, the jaws defining a crushing chamber (fig. 1) for receiving material, the swing jaw (16) mounted for cyclic movement in the direction of the fixed jaw (14); a cross beam (48) having first and second surfaces facing in opposite directions to one another, the cross beam adjustably disposed in a transverse axis of the frame; a toggle plate (44, 46) mounted in operative communication between a rear portion swing jaw and a first face of the cross beam wherein a hydraulic cylinder arrangement is on the opposite side of the cross beam from the toggle plate, in operative communication with a second face of the cross beam and wherein the hydraulic cylinder arrangement is pressurized to a predetermined value in use to

Art Unit: 3725

provide an adjustable, pre-loaded reaction against the toggle plate wherein the hydraulic cylinder arrangement includes two cylinders (50) one on either side of the frame.

With regard to claim 2, Altmayer inherently discloses the predetermined value is greater than zero.

With regard to claim 7, Altmayer discloses wherein a hydraulic circuit is provided in communication with the hydraulic cylinder arrangement (fig. 4).

With regard to claim 8, Altmayer discloses a relief valve (fig. 4).

With regard to claim 9, Altmayer discloses means provided for adjusting spacing between the jaws (36; fig. 1).

With regard to claim 11, Altmayer discloses wherein the hydraulic arrangement is preloaded against a part of the frame. Examiner notes any element attached, coupled or connected to the frame is “a part of the frame”, therefore, it is inherent that Altmayer’s *“hydraulic arrangement is preloaded against a part of the frame”*.

With regard to claim 12, Altmayer discloses wherein the frame provides a reaction to the action of the hydraulic cylinder arrangement.

With regard to claim 13, Altmayer discloses the hydraulic cylinder arrangement is in operative engagement with the second face of the cross beam (48). Examiner notes the claims do not specify direct operative engagement, thus because all of the elements of Altmayer are in operative, i.e., working engagement with one another so as to crush rock/concrete, Altmayer inherently discloses, *“the hydraulic cylinder arrangement is in operative engagement with the second face of the cross beam (48)”*.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Altmayer (4,927,089). Altmayer does not explicitly disclose the predetermined value to be between 300 and 500 bar. It would have been obvious at the time of the invention to one having ordinary skill in the art to construct Altmayer having a predetermined value between 300-500 bar because wherein the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable ranges involves only routine skill in the art. See *In re Aller*, 105 USPQ 233.

Furthermore, Applicant fails to positively recite any criticality as it relates to a pressurized value between 300-500 bar and as such recites such value only nominally. In the absence of any positively recited criticality to the use of a pressurized value in the range of 300-500 bar such would result from routine engineering practices and is not in itself patentable.

Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Altmayer (4,927,089) in view of Hamaguchi et al. (5,857,630). Altmayer does not disclose shim packs or wedges. Hamaguchi teaches in a closely related art the use of shims (9) so as to adjust the outlet gap between the jaws, i.e. adjust the spacing between a fixed jaw (3) and a movable jaw (4). Because the references are from a closely related art and deal with a similar problem, i.e., crushing rock between at least two opposing jaws and discharge of the crushed rock, it would

Art Unit: 3725

have been obvious at the time of the invention to the skilled artisan to provide Altmayer with shims so as to allow for adjustability of the spacing between the jaws as taught by Hamaguchi. Further, Examiner notes the provision of adjustability through shims is well known in the mechanical arts and does not in itself warrant patentability.

Allowable Subject Matter

Claims 5 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not disclose or fairly suggest *an aperture provided in each wall for movably receiving a respective end of the crossbeam* in combination with the rest of the positively recited limitations as set forth in claim. 5.

Altmayer is silent to any apertures in the walls. Accordingly Altmayer neither anticipates nor renders obvious the claimed invention as set forth in claim 5.

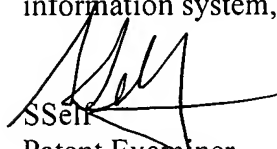

Neither the prior art of record nor any combination thereof discloses the claimed invention as set forth in claim 5. Therefore, claims 5 and 6 contain allowable subject matter over the prior art of record.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shelley Self whose telephone number is 571-272-4524. The examiner can normally be reached on 8:30 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lowell Larson can be reached on 571-272-4519. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

S. Self
